With a time lag between student choice of majors and later job quests, high schools and colleges cannot address short-term supply and demand shifts for particular professions. Such shortages can be erased only by raising wages to attract those with needed skills who are now working in other fields—or by importing low-paid workers.

For the longer term, rising wages can guide counselors to encourage well-prepared students to major in computer science and engineering, and colleges will adjust to rising demand. But more H-1B immigrants can have a perverse effect, as their lower pay signals young people to avoid this field in future, keeping the domestic supply artificially low.

IN HONOR OF THE CRUSIN' HALL OF FAME INDUCTEES AT THE ROUTE 66 RENDEZVOUS

### HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 2000

Mr. BACA. Mr. Speaker, the City of San Bernardino will be hosting its 11th Annual Route 66 Rendezvous event downtown this month. The event is expected to draw over 500,000 classic car fans to the downtown, with 2,448 prime classic cars at the event (the number of miles of the Route 66 highway). I would like to salute the event's inductees into the Crusin' Hall of Fame, an impressive and truly remarkable collection of honorees this year:

• Mattel, in honor of the significant impact the company has made in the American Automotive culture with the development of the miniature vehicles "Hot Wheels."

Mattel is known as a leader in the world of toy design, manufacturing, and marketing. Mattel introduced "Hot Wheels" miniature vehicles in 1968. The three-inch long cars and trucks reached out and captured children's imaginations. Mattel celebrated the 30th anniversary of "Hot Wheels" in 1998, and reached a milestone when they produced the two billionth Hot Wheel car, making Mattel the producer of more vehicles than Detroit's big three auto makers combined

 The Beach Boys, a popular sixties and seventies band that popularized surfing and cruising music, in honor of the significant part their music plays in the American automotive culture.

From Hawthorne, California, the three Beach Boy brothers—Brian, Dennis and Carl Wilson, plus cousin Mike Love and friend Al Jardine had some of the most intricate, beautiful harmonies heard from a pop band. Their music is still popular and can be heard on countless radio stations and car cruises around the nation.

- The J.C. Agajanian Family, a family with over fifty years in motorsports racing, in honor of their many significant contributions in the promotion, participation, and involvement in the American automotive culture.
- J.C. Agajanian, one of the most influential men in American motorsports history, is known for his involvement and many achievements in the motorsports world. In 1998, the Agajanians marked their 50th Golden Anniversary of promoting, participating, and involvement with the famed Indianapolis 500.
- The Woody, the hand-built "sport utility vehicle" of its day, in honor of the significant

role this unique automobile played in the American Automotive culture.

Since the sixties, these wagons have been popular collector's items. They are in such demand that old cars with splinters instead of wood are being lovingly restored and shown off at car shows and cruises throughout the United States.

#### DOGS IN SERVICE TO MANKIND

# HON. NITA M. LOWEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 2000

Mrs. LOWEY. Mr. Speaker, I rise today to commend the American Kennel Club's celebration of "Dogs in Service to Mankind." The American Kennel Club, established in 1884, is the world's largest purebred dog registry and the nation's leading not-for-profit organization devoted to the support of purebred dogs, responsible pet ownership and canine health.

As well as providing invaluable and beneficial companionship to millions of Americans, purebred dogs have provided service to mankind for generations and in a myriad of ways. Only a few examples are the dogs who accompanied our servicemen in every war; who rescue Americans every year from fire, entrapment and drowning; and whose powers of scent enable them to locate lost children, dangerous chemicals and illegal materials.

Dogs give vital assistance to the handicapped, ill and elderly, and these amazing creatures can even warn a person that a heart attack or epileptic seizure is about to occur. Many Americans have benefitted from the companionship and unconditional love that service dogs provide.

So today, I join the American Kennel Club in its recognition of dogs' extraordinary capabilities. I am delighted to Join in honoring these wonderful animals whose service to humankind deserves our utmost appreciation.

HONORING HO'OIPO DECAMBRA, 2000 ROBERT WOOD JOHNSON COMMUNITY HEALTH LEADER

## HON. PATSY T. MINK

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 2000

Mrs. MINK of Hawaii. Mr. Speaker, I rise today to acknowledge the tremendous contributions of Ho'oipo DeCambra, Executive Director of Ho'omau Ke Ola, for her work to improve the health and well-being of her rural community in Wai'anae, Hawaii. Ho'oipo's inspired leadership and innovative programs led to her being named a 2000 Robert Wood Johnson Community Health Leader.

Only ten people nationwide receive this prestigious award each year. The Robert Wood Johnson Community Health Leader award, the nation's highest honor for community health leadership, includes an \$100,000 cash award—\$95,000 goes to enhance the awardee's community health program and \$5,000 is a personal award.

Ho'oipo DeCambra has developed and implemented successful substance abuse treatment programs and a women's cancer project utilizing traditional Hawaiian values and healing practices to reach out to the Native Hawaiian community, which suffers from a high incidence of substance abuse and cancer. A long-time social justice advocate, Ho'oipo became involved in local health care after seeing the effects that disease and drug addiction have had on the people of her own community.

Troubled by the number of Hawaiian women with breast cancer, DeCambra pioneered the Women's Cancer Research Project, now called the Women's Health Network. The program teaches women and their families about breast and cervical cancers through "kokua" or help groups. The original study employed Hawaiian women with breast cancer in data collection and analysis.

Ho'oipo DeCambra has since turned her talents and energy to helping people who suffer from drug addiction. She directs a substance abuse treatment program, Ho'omau Ke Ola, that uses traditional Native Hawaiian healing methods in concert with the very latest clinical practices to treat the largely Hawaiian population of the Wai'anae coast of the island of O'ahu. Ho'omau Ke Ola also provides transitional shelter and distributes food to residents in the community.

Ho'oipo DeCambra previously served as chair of the board of the Wai'anae Coast Comprehensive Health Center. She is a founding board member of Ke Ola O Hawai'i, an academic community partnership organization. She also sits on the board of the Hawai'i Health Foundation, which promotes a traditional Native Hawaiian diet, and serves on an ad hoc committee of the U.S. Department of Health and Human Services' Office of Women's Health, Minority Women's Health Panel of Experts. Ho'oipo is also a published poet.

I am pleased to have this opportunity to congratulate Ho'oipo and to thank her for devoting her considerable talents and boundless aloha to improving the lives of the people in her community and throughout the state.

ST. THOMAS SYNAGOGUE—A NATIONAL HISTORIC LANDMARK

## HON. DONNA MC CHRISTENSEN

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 2000

Mrs. CHRISTENSEN. Mr. Speaker, I rise to pay tribute to the St. Thomas Synagogue, formally, the Synagogue of Beracha Veshalom Vegemiluth Hasidim, or in English, "the Synagogue of Blessing and Peace and Acts of Piety," located on Synagogue Hill overlooking Charlotte Amalie Harbor in the Federal Historic District of Charlotte Amalie, the capital of the United States Virgin Islands.

Today, September 12, 2000, marks the 167th Anniversary of the consecration of the St. Thomas Synagogue. This synagogue, a well-preserved structure, built 167 years ago today in 1833, is indeed rich in history, culture and architecture. It is the second oldest synagogue in the Western Hemisphere and the oldest in continuous use under the American flag.

For many Virgin Islanders, the St. Thomas Synagogue is a reminder of tolerance and equality, as well as of European expansion into the new world during the Spanish Inquisition of 1492. Practicing Jews were expelled
